

GOVERNOR'S SALMON RECOVERY OFFICE & COUNCIL OF REGIONS COMMUNICATIONS PLANNING

SUMMARY OF FINDINGS AND RECOMMENDATIONS AT A GLANCE | MARCH 2014

TO RECOVER SALMON SPECIES AND THEIR HABITAT, A SUCCESSFUL COMMUNICATIONS PLAN WOULD HELP ENSURE:

- More Washingtonians understand why salmon recovery is a priority
- Elected officials and others continue to fund salmon recovery, as a priority
- Volunteers remain enthusiastic, committed, reliable
- Private landowners embrace and execute salmon habitat recovery, and know full benefits
- Salmon professionals speak with one voice toward commonly understood goals
- Relationships with American Indian tribes would be positive and mutually supporting

WHAT NEEDS TO BE IN PLACE TO ACCOMPLISH THE ABOVE?

- Washingtonians make the link between salmon recovery and our quality of life
- Washingtonians understand the connection between salmon and our Northwest identity
- Washingtonians know their salmon recovery region, watershed, and priorities
- Washingtonians believe it's possible to protect, recover, and restore wild salmon to our waters
- Elected decision makers feel accountable to thousands working toward salmon recovery
- Salmon recovery remains grounded in local and regionally-led efforts by citizens
- County and other local governments consider salmon in growth management and shoreline master plans and

elsewhere and know where to get information

- Federal agencies fulfill obligations to manage federal lands and implement federal laws to protect and recover salmon
- State and tribal co-manager decisions on harvest and hatcheries are understood in connection with habitat recovery actions to help recover wild salmon
- State agencies want to integrate their activities with regional salmon recovery organizations
- GSRO has closer working relationship with tribal governments and staff
- Tribal governments and staff continue to work closely with regional organizations, lead entities

WHAT COMMUNICATIONS EFFORTS BY GSRO, RCO, REGIONAL, AND LEAD ENTITIES ARE CURRENTLY IN PLACE?

- Most region messaging is about progress on implementation of ESA recovery plans, is technical, and describes the "what" but not the "why" or the "so-what"; emphasizes stats without baselines or context
- Media and public are confused by lack of context, story (where we are compared to where we've been, where we're going); limited public education or outreach
- Relationship between GSRO, RCO, Council of Regions, and lead entities is hard to discern from multiple websites, "brands," organizational structure; does not convey a network
- GSRO website good clearing house; RCO has made best attempt at sharing logo, look & feel; State of the Salmon website much improved by standardized reporting and user-friendly graphics

- Communications from regions varies; outreach a requirement but ill-defined; varied look and feel
- Capacity to implement external communications/ outreach is low
- Washington Salmon Coalition taking first steps; materials need messaging work; education efforts would benefit from coordination and shared effort from regions, GSRO, WDFW, and perhaps RFEs and others
- Native American Tribes are seldom mentioned in GSRO, regions, and lead entities messaging or materials
- Legislature and others are hearing dozens of different messages rather than evidence of dozens of supporters of same effort
- No visible attempt to explain or contextualize competing or just siloed salmon-related messages

RECOMMENDATIONS

- Empower regional organizations and lead entities to lead us through this phase of salmon recovery (Washington Way; forum for All-H integration; tribal membership and support)
- Update local partners on regional salmon recovery status
- Connect the dots for people; ID multiple benefits of salmon recovery for our communities
- Remind audiences of how we connect around salmon; how salmon in our streams is essential to our identity as Northwesterners
- Recruit messengers who are not salmon professionals and help them tell their stories
- Identify ways for communities to connect and share positive experiences related to salmon
- Prioritize and speak to need as Council of Regions
- Improve internal and inter-agency/entity communications
- Support lead entities as critical outreach engines
- Maintain, stabilize, and increase federal sources of funding while developing alternatives
- Partner to educate the public on basics of conservation biology

- Develop region-specific messages in context of new shared statewide message framework
- Target collateral materials to specific audiences

PRIORITY AUDIENCES

TIER ONE

- The seven regional salmon recovery organizations (with tribal and county representatives)
- Lead Entities (Washington Salmon Coalition)
- Salmon Recovery Funding Board
- GSRO/RCO
- Washington Department of Fish and Wildlife
- Regional Fisheries Enhancement Groups
- Governor's natural resources policy staff

TIER TWO

- Washington legislative leaders relevant to salmon recovery
- Washington and Congressional delegation
- WA Department of Ecology; DNR; and other state agencies impacting salmon recovery
- Fishing and other recreational organizations
- Local media

TIER THREE

- Private Landowners
- Federal agencies, primarily NOAA, USFS, USFWS, EPA, and Army COE
- Potential partners
- Civic and community groups, e.g., Rotary, faith, veterans, school

GSRO & COUNCIL OF REGIONS COMMUNICATIONS WORKING GROUP

Brian Abbott (GSRO), Darcy Batura (WSC), Nancy Biery (SRF BD), Jeff Breckel (LCSRB), Jeanette Dorner (PSP), Alicia Lawver (PSP), Jennifer Quan (WDFW), Derek Van Marter (UCSRB), Susan Zemek (RCO).
