13	33.50	10-1148A	Badlands and Badland Lakes	Washington Department of Fish and Wildlife	\$1,000,000		\$1,000,000	Alternate
					\$7,967,734	\$4,730,810	\$12,698,544	\$2,769,120

NOTES:

"P" indicates partial funding.

- (1) Kent's Van Dyke Panther Lake Acquisition 2, 10-1271A, was funded with unused WWRP funds in a prior biennium. Funds moved to an eligible alternate
- (2) Shelton withdrew Eagle Point Acquisition, 10-1092A. Unwilling seller. Funds moved to an eligible alternate (10-1556A).
- (3) Port of Allyn unable to certify match for the Waterfront Park Expansion, 10-1109C. Funds moved to an eligible alternate (10-1556A)
- (4) State Parks has withdrawn the Saint Edward-McDonald, 10-1556A project. Acquisition costs exceed available funding.
- (5) Key Peninsula MPD's partially funded Taylor Bay Phase 1, 10-1312D, eligible for full funding. Project withdrawn.
- (6) Bainbridge Island Park District's partially funded Manzanita Bay Park2: Water Access, 10-1730A, eligible for additional funds.

Evaluators Score Questions: #1-8, RCO Staff Scores Questions: #9-10

LOCAL PARKS CATEGORY

Enumclaw

Grant Awarded: \$300,000

Improving Enumclaw Field

Enumclaw will use this grant to convert a 60-year-old sports field into a modern, multi-sports field with artificial turf. The field, known as Pete's Pool, was once the King County Fairgrounds Stadium and is the oldest football field in the state. The City will excavate the existing turf and soil, install a drainage system and artificial turf with football and soccer markings, update the visitor bleachers, replace the goal posts, install soccer goals, and put in accessible pathways to and around the field. The City also will make the parking lot accessible for people with disabilities. The field has poor drainage and turns into a muddy swamp by mid-season. There is no other artificial turf or lighted fields in the Enumclaw School District, which serves an area of more than 25,000 people. Enumclaw Field is the home field for high school and youth football teams. The City will contribute \$600,000 in staff labor, local and private grants, and donations of cash, labor, and materials. (10-1410)

Cheney

Grant Awarded: \$500,000

Developing Betz Park Baseball and Softball Fields

Cheney will use this grant to develop baseball and softball fields on 5 out of 50 acres of undeveloped property that it purchased 13 years ago. Development will include parking, a restroom, Little League-sized baseball field, a youth and adult softball field, and a smaller field designed for both T-ball and the challenger division for youth with physical disabilities. The City will contribute \$500,000 in cash and donations of cash and labor. (10-1237)

Covington

Grant Awarded: \$500,000

Improving Covington Community Park with a Sports Field and Trails

Covington will use this grant to improve Covington Community Park by expanding the trail system, adding a multi-purpose sports field, and providing a place for community events. The city does not have a municipal sports field so kids must travel to other city and county fields to play soccer. Community events were one of the top ranked recreation needs, yet Covington does not have a suitable location to hold events. Expanding Covington Community Park will address a long-term dream of citizens who have been working on this project since 2003, when the property was donated to the city. The City will contribute more than \$1 million from state funding, cash, and a local grant. (10-1346)

Pierce County

Grant Awarded: \$100,000

Building the Playground by the Sound

Pierce County Public Works and Utilities will use this grant to develop a 12,000-square-foot playground near University Place. When developed, it will be one of the largest in the community. Built for children aged 2-12, the playground will feature swings, tunnels, nets, bridges, slides, monkey bars, and a climbing wall. The Playground by the Sound

will be in the north meadow of Pierce County's Chambers Creek Properties on Puget Sound and will tie into the existing trail system. University Place partnered with local schools and community groups to look for opportunities to create parks. A committee approached the county with the idea for this playground. Hundreds of local school children and families helped design the playground to incorporate maritime and avian wildlife structures, which will capture the region's unique spirit and history. These same families plus many others are volunteering to raise money and build the playground. The County will contribute \$202,083 in staff labor, materials, state and private grants, and donations of cash, equipment, and labor. (10-1209)

King County

Grant Awarded: \$317,477

Developing Duthie Hill Park's Trailhead

The King County Department of Natural Resources and Parks will use this grant to develop a trailhead in Duthie Hill Park, the region's first mountain bike skills park. Crews will construct a 75-vehicle parking lot and staging area and install signs and park furniture. The 120-acre park has parking for only 15 vehicles forcing many visitors to park nearby and bike to the park on busy roadways with narrow shoulders and limited visibility. This project is part of a larger effort by King County and the Evergreen Mountain Bike Alliance to improve the park. The County will contribute \$317,477. (10-1321)

Newport

Grant Awarded: \$100,000

Constructing a Spray Park

Newport will use this grant to build a 3,500-square-foot spray park in the city's main park. The city has no swimming pools or outdoor water activities and the nearest spray park is nearly an hour's drive away. By building a spray park, the City will be providing a fun and safe place for children and the community to enjoy a free water feature. The City will contribute \$100,000 in cash, staff labor, equipment, materials, and donations of cash, equipment, labor, and materials. (10-1236)

Tacoma Metropolitan Park District

Grant Awarded: \$500,000

Developing Franklin Park

The Tacoma Metropolitan Park District will use this grant to upgrade the 20-acre Franklin Park. The district will build a sprayground to replace a 58-year-old wading pool, and construct a surrounding plaza and picnic shelter to support community events. The district also will add walking paths throughout the park to meet new standards for outdoor accessibility, install a rain garden drainage system, expand the community garden, install park furnishings and landscaping, and upgrade parking and street access. The park is in the Hilltop community, which is one of the most economically challenged, socially diverse areas in Tacoma. The district will contribute \$536,039 in voter-approved bonds. (10-1288)

Mason County

Grant Awarded: \$275,500

Renovating Infields at Mason County Recreation Area Park

Mason County will use this grant to renovate two infields at the Mason County Recreation Area Park near Shelton. The 30-acre sports complex hosts seven baseball and softball fields, and is used by multiple youth leagues, the Shelton School District, and tournaments. The county will replace the dirt infields with synthetic turf, and the outfields will remain grass. This project will improve field playability and reduce maintenance costs, rainouts, and the amount of water used at the park. The County also will make facilities accessible to people with disabilities by paving park pathways and the access to the bleachers and dugouts. The County will contribute \$275,660 in cash, equipment, staff labor, and donations of equipment and labor. (10-1064)

Pierce County

Grant Awarded: \$125,700

Providing New Playground Equipment at Frontier Park

Pierce County Parks and Recreation Services and the fifth-grade class of Kapowsin Elementary will use this grant to replace the heavily used play equipment at Frontier Park in Graham. The old play equipment was removed in 2009 when it failed a safety inspection. The community is raising money for the new equipment and its installation. The County will prepare the site, pave, and install signs. The new play equipment will include ramps, single and double slides, climbers, talk tubes, a tunnel, overhead ladders, crisscross webs, sky wheels, swings, and more. The County will contribute \$125,700 in cash and cash donations. (10-1609)

Hoquiam

Grant Awarded: \$198,754

Redeveloping Central Play Park

Hoquiam will use this grant to redevelop Art Pocklington Central Play Park, which is the city's most used and highly visible community park. The City will install a new playground, fence, and spray park. The existing wading pool requires lifeguards, which are difficult to find and afford on the city's limited budget. The spray park will be safer, less costly, and allow use on weekends and in the evenings. The City and Hoquiam School District use this park exclusively for summer recreation programs. The City will contribute \$242,922 in cash and a state grant. (10-1588)

DuPont

Grant Awarded: \$21,669

Building the DuPont PowderWorks Skatepark

DuPont will use this grant to construct part of a 6,000-square-foot skate park that will accommodate a variety of skating types and skill levels. The modular components will be constructed in PowderWorks Park on a level cement pad and will include simulated street features such as hand rails, ramps, steps, and grinding rails. The local skateboarding community helped design the skate park. The City will contribute \$97,057 in cash, and donations of cash, labor, and materials. The City received only part of the \$97,057 it requested, and may receive additional funds if money from other projects is unused. (10-1672)

Mossyrock

Grant Awarded: \$327,600

Buying Land for a Mossyrock Area Park

Mossyrock will use this grant to buy 32.25 acres for a community park. The property is historically significant, as it was a trading ground for Native Americans and the first settlers. The property was sold about 3 years ago for a 50-house development, but the developer went bankrupt. This land is ideally suited for a park because it is centrally located to downtown and is close to the school, community center, and city offices. Outside of school areas, there are limited recreation facilities within 40 miles of Mossyrock. This property will allow a wide range of activities for everyone. The Town will contribute \$338,560 from state and private grants and donations of labor and land. (10-1095)

Lacey

Grant Awarded: \$1,000,000

Buying Land for Pleasant Glade Community Park

The Lacey Parks and Recreation Department will use this grant to buy 67.09 acres for the future Pleasant Glade Community Park, which is in an area with no developed community parks. The City wants to buy land in the Woodland Creek corridor to add to the 313 acres currently owned by the city or protected. The purchase also will help improve water quality in the Henderson Inlet watershed and preserve the wildlife corridor along the creek. The land is up for sale and could be developed with more than 300 houses. The City will contribute more than \$1.3 million in cash, conservation futures¹, donated land, and staff labor. (10-1690)

King County

Grant Awarded: \$500,000

Expanding Cougar Mountain Park

The King County Department of Natural Resources and Parks will use this grant to buy 55 acres to expand the 3,100-acre Cougar Mountain Regional Wildland Park. The land is in the "Precipice Trail" area, which is in the northeast corner of the park adjacent to Issaquah. Acquiring land in this area has been a long-time priority of King County, Issaquah, and community partners such as the Mountains to Sound Greenway. About 40 acres border Newport Way Northwest, which will be used for a trailhead and parking lot, creating an Issaquah entrance to the park that is walking distance from a regional transit center. Another 15 acres contain existing trails and connect the future trailhead to the park boundary. These and future acquisitions in this area will create a permanent buffer between nearby homes and the park. The County will contribute more than \$1.5 million in conservation futures² and a local grant. (10-1313)

Wenatchee

Grant Awarded: \$342,620

Acquiring Saddle Rock

Wenatchee will use this grant to buy 325.12 acres, which includes Saddle Rock, one of the most identifiable land forms in the Wenatchee valley. The City first started

¹ Conservation futures are a portion of property taxes used by local governments to buy land or development rights to protect natural areas, forests, wetlands, and farms.

² Conservation futures are a portion of property taxes used by local governments to buy land or development rights to protect natural areas, forests, wetlands, and farms.

discussing acquiring the land for a city park or natural area in 1909. In the 1940s, a local effort to turn Saddle Rock into a state park never came to fruition. In 1963, a citizen committee formed to preserve Saddle Rock as an outlook but was unsuccessful. In 1967, the plans for the park were shelved. In 2007, city staff again started working to purchase the property. Local donors provided matching funds, the City received advance approval from the state to purchase the land, and the property was purchased. This grant will reimburse the city for the purchase. The acquisition will accomplish a 100-year-old community goal by protecting the community landmark in perpetuity. The land will provide a non-motorized trail system, important wildlife habitat, and an environmental education site for school children. The City will contribute \$361,620 in staff labor and donations of cash and labor. (10-1082)

University Place

Grant Awarded: \$75,000

Buying the Leach Creek Property for a Park

University Place will use this grant to help buy nearly 15 acres for a park. There are no other parks or public open spaces within the area, which serves about 11,590 residents. The park, which will have baseball fields, a picnic shelter with tables, children's play equipment, benches, and walking paths, also will be home to a trailhead for the proposed Leach Creek Trail. The City will contribute \$750,000 in conservation futures.³ The City received only part of the \$750,000 it requested, and may receive additional funds if money from other projects is unused. (10-1157)

Peninsula Metropolitan Park District

Grant Awarded: \$381,832

Buying Knight Forest to Expand a Local Park

The Peninsula Metropolitan Park District will use this grant to buy 18.79 acres, known as the Knight Forest, next to the Harbor Family Park on the Gig Harbor peninsula. The forest will add trails and natural areas to the Harbor Family Park site, which will have ball fields and other recreation elements. The surrounding area is the most densely populated area of the peninsula outside of Gig Harbor, with public and private elementary schools nearby. The owners are selling the property and have obtained a logging permit. The district will contribute \$381,833 in donations of cash and land. (10-1268)

Ridgefield

Grant Awarded: \$153,775

Expanding Abrams Park

Ridgefield will use this grant to buy 3 acres to expand Abrams Park, the city's largest and most widely used park. Abrams Park is a 38-acre community park that was developed in the 1970s and serves more than 4,000 residents. The park's fields serve as the primary place for organized baseball and soccer leagues in the city and offer one of the few places for large gatherings. The City had the opportunity to expand the park boundaries and, with advance approval from the Recreation and Conservation Office, bought 3 acres on the northwest corner. This grant will reimburse the city for the cost of

³ Conservation futures are a portion of property taxes used by local governments to buy land or development rights to protect natural areas, forests, wetlands, and farms.

the land. The City will contribute \$153,775 in cash. The City received only part of the \$730,134 it requested, and may receive additional funds if money from other projects is unused. (10-1204)

Vancouver

Grant Awarded: \$158,273

Buying Land for the Rose Village Neighborhood Park

The Vancouver-Clark Parks and Recreation Department will use this grant to buy .5 acre in the Rose Village neighborhood in Vancouver for a park. The Rose Village area is a densely developed, low-income area, isolated by Interstate 5 to the west, State Route 500 to the north, and a major road to the south. Another major arterial bisects the neighborhood east-west, making it unsafe for children to cross to school. There are no parks to serve this neighborhood; and school facilities are available only after school and do not provide play equipment for small children. The City is negotiating with two willing landowners to buy adjacent lots for the park, which will provide a play area for small children. The City will contribute \$292,300. The City received only part of the \$292,300 it requested, and may receive additional funds if money from other projects is unused. (10-1187)

STATE LANDS DEVELOPMENT AND RENOVATION CATEGORY

Washington State Department of Natural Resources Grant Awarded: \$247,870
Replacing Tiger Mountain State Forest Trail Bridges

The Department of Natural Resources will use this grant to replace a collapsed trail bridge and install two new trail bridges along a new trail connection within Tiger Mountain State Forest. By installing two new bridges, using an existing trail segment, and building 1.96 miles of new trail, the popular Railroad Trail and Northwest Timber Trail finally will connect. Tiger Mountain offers a great recreational opportunity; many people use the forest daily for hiking, mountain biking, and horseback riding. The department will contribute \$62,000 in staff and donated labor. (10-1067)

Washington State Department of Natural Resources Grant Awarded: \$275,271
Building the Middle Fork Ahtanum Trail and Trailhead

The Department of Natural Resources will use this grant to develop 2-4 miles of a non-motorized trail and a trailhead in the Ahtanum State Forest, which is 25 miles west of Yakima. The department also will develop a parking area, build a restroom, install signs and kiosks, and landscape. The development is the result of a community planning effort that identified the middle fork Ahtanum area as a logical place for a year-round, non-motorized trail system. The area is unique because its relatively low elevation, low amount of rain and snow, and closeness to a paved road means it will have year-round use. The department will contribute \$23,800 in donated labor. (10-1427)

Washington State Department of Natural Resources Grant Awarded: \$325,000
Developing the Reiter Foothills Trail System

The Department of Natural Resources will use this grant to develop a non-motorized trail system in northwest portion of Reiter Foothills Forest, extending from Reiter Road north and connecting to Wallace Falls State Park. The department will build trails for hiking, mountain biking, and equestrian use, and install a major trail bridge and signs. Construction of these trails will improve public safety, reduce natural resource damage, and meet increasing public demand for the area. Less than 30 miles from Everett, the Reiter Foothills Forest includes about 10,000 acres of sub-alpine terrain between the Skykomish River to the south and the Sultan River basin to the north. The Wild Sky Wilderness Area makes up the eastern border of the forest, and forest and houses are along the western edge. The department will contribute \$20,000 in donated labor. (10-1070)

Washington State Department of Natural Resources Grant Awarded: \$89,300
Developing the Mailbox Peak Trail

The Department of Natural Resources will use this grant to build a portion of a trail to the summit of Mailbox Peak, which is in the Middle Fork Snoqualmie Natural Resources Conservation Area in eastern King County. The trail will improve public safety, reduce natural resource damage, and meet increasing public demand. It will provide an alternative to the direct trail to the peak, which was "boot-built" many years ago, is

unsuitable for most hikers, and cannot sustain its current high level of use. The existing route is extremely steep and gains 4,000 feet of elevation in less than 2.5 miles. King County Search and Rescue is called weekly during the spring and summer to rescue lost or injured hikers. In addition, increased use is causing severe erosion. The new trail head will serve as an entrance portal for the public lands in the valley surrounding the middle fork of the Snoqualmie River and construction will be completed in 2011. The department will contribute \$189,500 in staff labor, equipment, a federal grant, and donated labor. The department received only part of the \$325,000 it requested, and may receive additional funds if money from other projects is unused. (10-1072)

Washington State Department of Natural Resources Grant Awarded: \$42,259
Providing Access to the Chehalis River

The Department of Natural Resources will use this grant to provide access to the Chehalis River within the Chehalis River Surge Plain Natural Area Preserve. The department will create a launch for hand-carried boats, a shoreline trail, improved parking, bank fishing sites, and natural area interpretation. Two ramps for hand-carried boat will provide access for canoes, kayaks, and skiffs to both the Chehalis River and Blue Slough. Parking will be improved for both sites and a riverbank interpretive trail will border the river along an existing screen of native trees and shrubs. Access for bank fishing will be made safer, with erosion protection, at both work sites. The Chehalis River Surge Plain Natural Area Preserve is 2,700 acres and protects the largest high quality surge plain wetland in the state. Sitka spruce dominated wetland forests hang over winding sloughs, and fish, waterfowl, and wildlife thrive here. The department will contribute \$15,000 in donated labor. The department received only part of the \$153,800 it requested, and may receive additional funds if money from other projects is unused. (10-1489)

STATE PARKS CATEGORY

Washington State Parks and Recreation Commission Grant Awarded: \$900,000
Protecting State Parks by Buying Inholdings and Adjacent Properties

State Parks will use this grant to buy private property that is within or adjacent to park boundaries. From time-to-time, State Parks learns of desirable properties adjacent to or actually within the boundaries of a park. Some of these properties are small and consequently may not compete well during a competitive grant process. Others must be purchased quickly. In the past, grants have been used to buy property to remove undesirable neighbors (tavern) from a park, to obtain legal access to a park, to acquire desirable property listed with a real estate agent, and to buy land with high natural resources value. (10-1242)

Washington State Parks and Recreation Commission
Buying Land to Protect Long Beach Grant Awarded: \$2,250,000

State Parks will use this grant to buy 30.4 acres including nearly .2 mile of ocean waterfront in the Seaview Dunes area on the Long Beach peninsula. Long Beach has 26 miles of public beach. The Seaview Dunes portion was zoned for development as single-family and multi-family homes. State Parks wants to buy them as they become available to retain the visual integrity and habitat of the dunes and beach. (10-1306)

Washington State Parks and Recreation Commission
Extending Cape Disappointment's Multi-Use Trail Grant Awarded: \$1,600,000

State Parks will use this grant to construct a .5-mile trail that will link North Head Lighthouse with the Lewis and Clark Discovery Trail. The lighthouse is the most visited area of Cape Disappointment State Park. It also is a key site on the discovery trail, which runs from Ilwaco's waterfront, to the state park at Beards Hollow, and to Long Beach. State Parks' portion of the trail connects at a county road and this grant will allow the agency to build a new connector that is separate from the county road and will link with the future Bell's View Trail. (10-1308)

Washington State Parks and Recreation Commission Grant Awarded: \$540,828
Buying a Trail Easement through the Green River Gorge

State Parks will use this grant to buy an easement for a 2.2-mile trail in the Green River Gorge Conservation Area. State Parks has been trying to buy land within the gorge between Flaming Geyser and Kanaskat-Palmer State Parks since the conservation area's creation in 1969. There are only a few gaps in ownership on the south side of the river, and this purchase will close the most significant of those gaps. The trail easement runs along the top of the gorge in the Icy Creek area, just east of State Route 169. It will provide a route for a trail that connects State Parks' land in the Kummer Mines Heritage Area and the Hanging Gardens area. Recently, the owner subdivided the property for development. This project will ensure the trail corridor remains open to the public and houses aren't built on the edge of the gorge. (10-1723)

**WASHINGTON WILDLIFE AND
RECREATION PROGRAM
GRANTS AWARDED (FISCAL YEAR 2012)**

Washington State Parks and Recreation Commission Grant Awarded: \$587,372

Expanding Nisqually State Park

State Parks will use this grant to buy about 70 acres within the long-term boundary of Nisqually State Park. The land provides the only road and trail access to a large portion of the park. State Parks received only part of the \$900,000 it requested, and may receive additional funds if money from other projects is unused. (10-1244)

TRAILS CATEGORY

Mount Vernon

Grant Awarded: \$781,200

Building the Skagit Riverwalk Trail

Mount Vernon will use this grant to build a .34-mile riverfront trail in the city's historic downtown. The pedestrian trail will have a 24-foot-wide, decorative concrete walkway with expansive views of the Skagit River and downtown. This trail, the city's most significant, will increase access to the shoreline and opportunities for public recreation. It is being built on the city's main parking lot. This project has strong community involvement and support among citizens, public officials, and key city leaders. Senator Patty Murray and the Governor's Office financially have supported the project. The City will contribute \$781,200 in cash and a state grant. (10-1591)

King County

Grant Awarded: \$500,000

Building a Trail in East Lake Sammamish

The King County Department of Natural Resources and Parks will use this grant to develop 1 mile of trail from Northwest Gilman Boulevard in central Issaquah to Southeast 56th Street along an abandoned railroad. The paved trail will be 12 feet wide with 2-foot-wide gravel shoulders on each side. The County will add a retaining wall and install landscaping, fences, signs, and traffic controls. This is the second phase of a multi-phase project to complete an 11-mile trail corridor, which runs the length of the east side of Lake Sammamish, connecting the cities of Redmond, Sammamish, and Issaquah. This trail is a vital part of a 44-mile, multi-modal, non-motorized trail system extending from Puget Sound in Seattle to the Cascade foothills. This project will replace a gravel path, which is approved for use through 2015. Supporters of this project include Issaquah, Sammamish, Redmond, Cascade Bicycle Club, Bicycle Alliance of Washington, Mountains to Sound Greenway Trust, and Transportation Choices Coalition. The County will contribute more than \$1 million from a federal grant and a voter-approved levy. (10-1615)

Eatonville

Grant Awarded: \$700,000

Building the Bud Blancher Trail

Eatonville will use this grant to build a 2.3-mile, non-motorized, multi-use trail between Eatonville and the University of Washington's Pack Forest. The 10-foot-wide trail will begin at the Eatonville School District playfields near the town center and end at Pack Forest, providing access to the hundreds of miles of trails within the forest. The town's long-term goals would extend the trail to Rim Rocks County Park, the planned Nisqually Mashel State Park, the Cascade Foothills Trail, and the Yelm Tenino Trail. The Bud Blancher Trail was identified as the backbone of a local trails system and momentum for the proposed trail has been growing. Eatonville received about \$500,000 in donations from the Bud Blancher Estate, the Rails to Trails Conservancy, and Peter and Christine Koch. When constructed, this trail would be the first paved, multi-use trail in south Pierce County. The Town will contribute \$702,546 in cash and cash donations. (10-1037)

Bainbridge Island Park District

Grant Awarded: \$211,000

Buying Land for the Forest to Sky Trail

The Bainbridge Island Park District will use this grant to buy 4 acres to provide the last link in the east-west corridor of the 5.5-mile Forest to Sky Trail. Contemplated since the 1970s, the Forest to Sky Trail crosses Bainbridge Island to link three parks (The Grand Forest, Meigs Park, and Battle Point Park) and two Bainbridge Island Land Trust corridor lands. This purchase will connect two portions of The Grand Forest together and connect to Meigs Park and Manitou Beach. Trail users will see a panoramic view from Manitou Beach to Seattle, as well as forests, ponds, wetlands, meadows, and the Olympic Mountains. The district will contribute \$211,000 in voter bonds and donated land. (10-1568)

Jamestown S'Klallam Tribe

Grant Awarded: \$52,000

Extending a Railroad Bridge over the Dungeness River

The Jamestown S'Klallam Tribe will use this grant to extend an historic bridge and trestle 100 feet so that it fully spans the Dungeness River's migration area. Erosion, snow, and floods have damaged the trail bridge. The historic bridge is in the 28-acre Railroad Bridge Park and is a centerpiece of the Olympic Discovery Trail, which connects Port Townsend to the west Olympic peninsula. The trail is used by commuters, runners, bicyclists, and walkers, and is especially popular for families because of its scenic, quiet setting and safety away from traffic. It also is a popular bird and fish watching spot, as the bridge crosses the Dungeness River and multiple side channels. The trail extension will prevent impairment to the west side channel of the river, which provides rearing habitat for four salmon species listed as threatened with extinction under the federal Endangered Species Act (Puget Sound Chinook, Hood Canal and Strait of Juan de Fuca summer chum, Puget Sound steelhead, and bull trout). The tribe will contribute \$52,000 in cash donations, staff labor, and a federal grant. (10-1364)

Sumner

Grant Awarded: \$978,999

Building a Section of the Urban to Mountain Trail

Sumner will use this grant to build .37 mile of trail on the north end of Sumner's Urban to Mountain Trail. The trail follows the White River on the west edge of Sumner Meadows Golf Links, crosses the river on a pedestrian bridge, and continues to the site of a future city park. Sumner's Urban to Mountain Trail, including this section, is the missing link for 38 continuous miles of trail from Seattle's Interurban Trail to the Foothills Trail leading to Mount Rainier. The City will contribute more than \$1.2 million in cash and federal and private grants. (10-1660)

Entiat

Grant Awarded: \$400,000

Building the Entiat Waterfront Trail

Entiat will use this grant to redevelop part of about 6 acres along the Columbia River and Lake Entiat. The City will develop a 1-mile waterfront trail; restore habitat along the shoreline; install trail lights, benches, and trash cans; and build a parking area, road,

and restroom. The project will establish habitat along this shoreline of statewide significance, provide the public with access and views to the water, and create environmental and historical educational opportunities at viewing areas and with interpretive signs. The trail is part of a larger, planned project that ultimately will connect to form about 6 miles of continuous trail. The City will contribute \$500,000 from local and state grants. The City received only part of the \$500,000 it requested, and may receive additional funds if money from other projects is unused. (10-1113)

Mukilteo

Grant Awarded: \$220,000

Finishing the Big Gulch Trail

Mukilteo will use this grant to build a .64-mile nature trail in Big Gulch. Development will include a 3- to 4-foot-wide, soft surface, natural trail, boardwalks, education signs, a viewpoint, and entry structures. The trail will accommodate walkers, hikers, and bicyclists. This trail segment is the last remaining undeveloped link of a 2-mile recreational trail system within Big Gulch and connects to a regional bicycle system on State Route 525 and 112th Street that feeds into the countywide, interurban trail system. The trail also provides important local connections to neighborhoods, 92nd Street Park and trails, the city library and fire station, and schools. The City will contribute \$301,505. (10-1038)

Twisp

Grant Awarded: \$75,107

Securing Land for the Twisp Community Trail

Twisp will use this grant to buy right-of-way across six pieces of property for a trail that will connect to the town's park. Visitors along much of the route will have views of the Methow and Twisp Rivers from low bank areas and dike trails. This is the first phase of a larger town trail plan and ensures public access and neighborhood connections to more than 1 mile of Twisp and Methow River shoreline. The Twisp Community Trail will connect neighborhoods south of the town park and west of Highway 20 to the park by a safe pathway. Currently, children have to walk on the road because there are no sidewalks. The Town will contribute \$80,757 in donations of labor and property interest. (10-1378)

WATER ACCESS CATEGORY

Peninsula Metropolitan Park District

Grant Awarded: \$1,267,875

Buying the DeMolay Property for a Park

The Peninsula Metropolitan Park District will use this grant to buy 3.56 acres, including about a quarter mile of shoreline, for a park, and to protect valuable habitat. The DeMolay property is a pristine sand spit on the north east tip of Fox Island, just west of Gig Harbor. The purchase will protect a treasured piece of waterfront from development while providing access to the water for the public. Protection of the natural area is another benefit of this acquisition. The property is for sale and likely would be developed for homes. The district will contribute more than \$1.2 million in cash and donated land. (10-1271)

Clallam County

Grant Awarded: \$50,000

Buying Clallam Bay Property for a Park

Clallam County Parks, Fair and Facilities Division will use this grant to buy 7.45 acres in the community of Clallam Bay. The County owns the adjacent parcel and, with this purchase, would create a place for a future, 8.64-acre park. The waterfront property would provide year-round access to Clallam Bay, on the Strait of Juan de Fuca. Water access sites are limited in this area, with the county's Clallam Bay Spit Park only allowing limited public access because of recent flooding and a washed out bridge. Future development would include paving the entry road and parking area, and installing a vault toilet, picnic tables, and barbeque grills. The County will contribute \$50,000. (10-1348)

Chelan

Grant Awarded: \$500,000

Improving Access to the Water at Don Morse Park

Chelan Parks and Recreation Department will use this grant to restore about 2.5 acres and 175 feet of natural beach at Don Morse Park, the first phase of a multi-phase project to restore about a quarter mile of natural beach. The City will provide erosion protection by building a drift sill, restore the swimming beach, create a pea gravel beach that will be more stable and require minimal maintenance, and plant native plantings at the top of the sill to provide habitat for wildlife. The City also will add a crushed rock path from the parking area to the water, build an accessible swim ramp into the water, and add a launch for hand-carried boats. Chelan's population swells from 4,000 to more than 20,000 in summer. Residents and visitors are cut off from much of Lake Chelan by private development and a lack of beaches. The City will contribute \$500,000. (10-1212)

Washougal

Grant Awarded: \$64,795

Replacing the Hathaway Boat Launch

Washougal will use this grant to remove the Hathaway boat launch, construct a new launch, and create a more accessible path to the beach for people with disabilities. Hathaway Park, one of Washougal's most visited parks, provides boat access to the

Washougal River. The launch has seen no major improvements or repairs since it was built 30 years ago, and it has worn into a potentially unsafe condition. The upper Washougal River is known as an advanced water trail because of its challenging boulders and narrow channels. Hathaway Park provides one of two trailer launches on the river and a gentle river experience for a wide variety of users. The potential loss of this launch eliminates a valuable service for both upstream users who take out here and boats that travel between Hathaway and the downstream access points. The City will contribute \$64,796. (10-1098)

Mason County

Grant Awarded: \$450,000

Buying and Developing Coulter Creek Park

Mason County will use this grant to buy and develop about 50 acres at the head of North Bay, between Allyn and Victor. The property has about 18 acres of forest and about 32 acres of wetlands, primarily tidelands and mud flats. The County plans to develop a trailhead for the North Bay Trail, a boardwalk, and forested trail to a water viewpoint, as well as provide environmental education, historical interpretation, a community shellfish area, and a small parking area with a restroom. The majority of the property would be left undisturbed. Partners include the Allyn Business Association, Port of Allyn, Squaxin Island Tribe, and Taylor's Shellfish. The County will contribute \$550,000 in cash, staff labor, grants, and cash donations. (10-1601)

Bainbridge Island Park District

Grant Awarded: \$436,450

Conserving Manzanita Bay Shoreline

The Bainbridge Island Park District will use this grant to buy and conserve about 8 acres, including about 464 feet of shoreline, on Bainbridge Island near Manzanita Bay Park. The park provides the only public access to Manzanita Bay aside from a single, public road end. Of the island's 53 miles of shoreline, only 3.4 miles or less than 7 percent is in public ownership. The purchase will provide access to the water for the public and preserve salmon habitat. The property has a pebbly beach and tideland area, fruit trees, a lawn, and views across the bay. The tidelands are an abundant source of forage fish, particularly herring important to coho, Chinook, and other priority fish species. Bainbridge Island's Historic Preservation Commission, Open Space Commission, Watershed Council, Suquamish Tribe, and kayak enthusiasts support the project. The district will contribute \$1.1 million in cash and a state grant. The park district received only part of the \$840,061 it requested, and may receive additional funds if money from other projects is unused. (10-1730)

CRITICAL HABITAT CATEGORY

Washington State Department of Fish and Wildlife **\$2,750,000**
Conserving the Heart of Cascades

The Department of Fish and Wildlife will use this grant to buy 7,711 acres on the east slope of the central Cascade Mountains near Yakima. A striking array of habitat and species occur here because of the substantial elevation change, from 2,500 feet to 6,000 feet in height, and the wide range of rain and snow levels. Spotted owls live in the old growth forests, mountain goats climb the upper elevations, coho salmon and steelhead live in the streams, and several species of lizards and snakes reside at the lower elevations. Four watersheds have their headwaters on Bald Mountain and feed both the Naches and Yakima Rivers. The land has a checkerboard of ownership and is within the Okanogan-Wenatchee National Forest, next to the Wenas Wildlife Area and State Department of Natural Resources' forestlands. The land also is used extensively for recreation. This purchase is part of a larger effort that already has conserved 2,675 acres and is a critical match for recent federal funding. (10-1272)

State Department of Fish and Wildlife **Grant Awarded: \$4,200,000**
Protecting Mountain View Habitat

The Department of Fish and Wildlife will use this grant to buy 6,500 acres in southern Asotin County, including portions of the Wenatchee and Cottonwood Creek drainages, tributaries of the Grande Ronde River, and Grande Ronde River shorelines. The land is bordered on the north by a national forest, on the south by Bureau of Land Management lands, and on the east and west by private lands. This purchase will protect creek and river shorelines, cliff and talus habitats, riparian, meadows, springs, curleaf mahogany, interior grassland, and ponderosa pine habitats to benefit steelhead, bull trout, elk, bighorn sheep, deer, wolves, golden eagles, and many other plants and animals. (10-1613)

Washington State Department of Fish and Wildlife **Grant Awarded: \$1,867,300**
Protecting Rattlesnake Mountain

The Department of Fish and Wildlife will use this grant to buy about 6,500 acres of ecologically unique shrub steppe habitat on Rattlesnake Mountain. Buying this much land offers a rare opportunity to conserve wildlife corridors and buffer existing conservation lands at Hanford Reach National Monument and the Sunnyside Wildlife Area on the north side of the mountain. This purchase will protect a substantial portion of the south side, preventing development of wind turbines, houses, and vineyards on land Ferruginous hawks call home. The hawks are state listed as threatened with extinction. Fewer than 40 breeding pairs remain in southeastern Washington. The land also is home to other priority species including burrowing owl, long-billed curlew, Townsend's ground squirrel, American badger, black- and white-tailed jackrabbit, sage sparrow, sage thrasher, elk, and mule deer. Conservation and outdoor recreation groups have identified this property as a priority for protection. The project is supported by the U.S. Fish and Wildlife Service, the Richland Rod and Gun Club, and the Lower

**WASHINGTON WILDLIFE AND
RECREATION PROGRAM
GRANTS AWARDED (FISCAL YEAR 2012)**

Columbia Basin Audubon Society. The department received only part of the \$3.5 million it requested, and may receive additional funds if money from other projects is unused.
(10-1150)

NATURAL AREAS CATEGORY

Washington State Department of Natural Resources Grant Awarded: \$1,887,138
Expanding the Klickitat Canyon Natural Resources Conservation Area

The Department of Natural Resources will use this grant to buy 1,120 acres for inclusion in the Klickitat Canyon Natural Resources Conservation Area. The land contains habitat for sandhill cranes, Mardon skipper butterflies, and six rare plant populations. This is one of only four nesting, foraging, and fledging habitats in Washington for the state endangered sandhill crane, and provides a vital link between similar habitat on Yakama Nation lands and in the Conboy Lake National Wildlife Refuge. The area used by the cranes includes a remote wetland and dry meadow complex that provides an undisturbed nesting location. The purchase will protect the various habitats, provide opportunities for restoration that will improve habitat on lands already in the conservation area, and add rare plant populations to the site. (10-1472)

Washington State Department of Natural Resources Grant Awarded: \$2,925,261
Protecting the Dabob Bay Natural Area Shoreline

The Department of Natural Resources will use this grant to buy 90 acres to protect some of the most ecologically important and highly threatened private shoreline in the 6,287-acre Dabob Bay Natural Area on Puget Sound. The land includes coastal bluffs and shorelines that provide sediment and woody materials to keep the Dabob Bay system functioning. The purchase will protect local water quality and habitat for animals listed under the federal Endangered Species Act, such as orca, marbled murrelet, Hood Canal summer chum salmon, Chinook salmon, and steelhead trout. Dabob Bay is one of the most intact estuarine bays remaining in Puget Sound, but is threatened by increasing shoreline development within rapidly growing eastern Jefferson County. The department is working with The Nature Conservancy, Northwest Watershed Institute, and Jefferson Land Trust on a multi-phased project to protect an intact coastal estuarine system. (10-1458)

Washington State Department of Natural Resources Grant Awarded: \$1,065,801
Expanding the Mima Mounds Natural Area Preserve to Protect Prairie, Woodlands

The Department of Natural Resources will use this grant to buy part of 150 acres of oak woodland, prairie, and riparian habitat next to the Mima Mounds Natural Area Preserve. Prairie and oak woodland habitats are among the most threatened in Washington, with only 3 percent of the historic prairie-oak landscape still intact. This preserve is one of the largest intact prairie sites left in western Washington and includes the last, best example of mounded prairie in the state. It also is recognized nationally for its ecological and geological importance, as a national natural landmark. The prairie and oak habitats on the site support populations of a number of prairie-dependent butterflies and birds, including the valley silverspot, Oregon branded skipper, western meadowlark, and savannah sparrow. Mima Mounds is also a high priority location for re-introduction of other imperiled prairie species such as the Mardon skipper butterfly and golden

WASHINGTON WILDLIFE AND RECREATION PROGRAM GRANTS AWARDED (FISCAL YEAR 2012)

paintbrush. This proposal is part of a regional conservation plan developed by partners, including the Washington State Department of Fish and Wildlife, Fort Lewis Military Reservation, U.S. Fish and Wildlife Service, and The Nature Conservancy to protect remnants of these natural communities and restore their structure and function. The department received only part of the \$1.5 million it requested, and may receive additional funds if money from other projects is unused. (10-1465)

STATE LANDS RESTORATION AND ENHANCEMENT CATEGORY

Washington State Department of Natural Resources Grant Awarded: \$151,000
Restoring the Washougal Oaks Natural Area

The Department of Natural Resources will use this grant to restore important wildlife habitat in the Washougal Oaks Natural Area, which contains the largest, high quality, native, oak woodland remaining in western Washington. Oak woodland ecosystems in western Washington have declined and those that remain have been degraded significantly by land conversion, fire suppression, grazing, and invasion by conifers and non-native plants. The oak forest protected in the natural area is in good condition; however, some patches of native oak forest were cleared in the past. The department will restore 15 acres of horse pasture to native oak habitat by planting Oregon white oaks and other native plants. The department also will remove invasive plants, such as Himalayan blackberry. A second component of this project is to improve fish habitat. Past mining and logging have altered the natural hydrology of Lawton Creek and greatly reduced the amount of tree root wads and other large woody materials in the creek, which are needed for healthy salmon habitat. The department will place Douglas fir trees, which will be thinned during the first phase of this project, in Lawton and Walton Creeks. The department also will build an off-channel pond to improve fish habitat. The department will contribute \$3,500 in donated labor. (10-1646)

Washington State Department of Fish and Wildlife Grant Awarded: \$244,800
Restoring the Sinlahekin Ecosystem through Fire

The Department of Fish and Wildlife will use this grant to restore the Sinlahekin Wildlife Area ecosystem by thinning and burning the ponderosa pine forest. Fire, a key ecological process, has been eliminated for nearly 100 years. Fire and fire byproducts support a mosaic of plant communities, in various stages of growth, across the landscape, and wildlife dependent on these habitats. The department will reduce the historically uncharacteristic accumulation of brush and trees by thinning, pruning, piling, and burning the bushes and trees, and doing controlled burns. This project is expected to improve conditions for many wildlife species, particularly flammulated owls, pygmy nuthatches, white-headed woodpeckers, and mule deer. The project will also reduce the risk of catastrophic wildfire, improve forest health, and provide jobs. (10-1629)

Washington State Department of Natural Resources Grant Awarded: \$145,500
Restoring Trout Lake Meadow

The Department of Natural Resources will use this grant to restore the hydrology and vegetation of the meadows at Trout Lake Natural Area Preserve, with the goal of improving habitat for the Oregon spotted frog, sandhill crane, pale blue-eyed grass, and other wetland species. The Trout Lake wetland system contains the second largest of the four known Washington populations of the Oregon spotted frog, a state sensitive species. Sandhill cranes, a state endangered species, use this site as a staging area and potential nesting area. The department will remove .37 mile of old irrigation ditches

in the east meadow area and take out the old road on the western part of the preserve. The department also will control weeds on 25 acres, allowing native species to reestablish in the meadow. The ditches and old road will be planted with native plants. Past diversion of water from the meadow made the area drier, which decreases Oregon spotted frog breeding habitat, limits food for sandhill cranes, and limits pale blue-eyed grass habitat. (10-1508)

Washington State Department of Fish and Wildlife **Grant Awarded: \$360,950**
Restoring South Sound Prairies

The Department of Fish and Wildlife will use this grant to continue restoration of five areas in southern Puget Sound by removing invasive plants and replanting. Scatter Creek, Mima Mounds, Bald Hill, Rocky Prairie, and West Rocky Prairie are home to many rare plants, animals, and plant communities of concern to the Washington Departments of Fish and Wildlife and Natural Resources. The five sites contain more than 60 percent of the remaining, native-dominated prairie outside of Joint Base Lewis McChord in southern Puget Sound. The department will eradicate invasive plant species, using controlled fire and herbicide. The two agencies are partnering with The Nature Conservancy and Joint Base Lewis McChord to increase the seed production capacity. This cooperative project will save the agencies time and money by avoiding redundancies in staffing, contracting, and seed source development. The department will contribute \$20,000 from a federal grant. (10-1440)

Washington State Department of Natural Resources **Grant Awarded: \$77,450**
Restoring Camas Meadows' Rare Plant Habitat

The Department of Natural Resources' Natural Areas Program will use this grant to restore and enhance habitat for two, rare plant species, the Wenatchee mountain checkermallow and Wenatchee larkspur. The Camas Meadows contain the largest populations in the world of both species. The site is critical to the long-term viability of both plants, which require open, seasonally wet habitats. Ditches, livestock grazing, and invasive species have degraded the site. This project will restore hydrology on 18 acres and restore native wet meadow plant communities, including the two rare plants, on 5 acres. Invasive species will be controlled on an additional 11 acres adjacent to the wet meadow. The department also will burn 3 acres to reduce encroaching shrubs and trees and to stimulate growth of both rare plant species. The department will contribute \$6,000 in a federal grant and donated labor. The department received only part of the \$145,500 it requested, and may receive additional funds if money from other projects is unused. (10-1453)

URBAN WILDLIFE HABITAT CATEGORY

Washington State Department of Natural Resources Grant Awarded: \$1,810,042
Protecting 100-year-old Forests

The Department of Natural Resources will use this grant to buy 103 acres in the Stavis Natural Resources Conservation Area and Kitsap Forest Natural Area near Bremerton. The land is part of a larger area that contains the highest quality of a rare forest of trees more than 100 years old. More than 98 percent of similar mature forests have been lost since European settlement in the Puget trough ecoregion, which runs the length of Washington between the Cascade Mountains on the east and the Olympic Mountains and Willapa Hills on the west. The larger area contains managed forestlands that are one of the most important landscapes for the conservation of biological diversity in the Puget trough. Stavis Creek, which runs through the property, is one of the best remaining Hood Canal salmon spawning habitats and is a designated recovery area for threatened Hood Canal summer chum. High-quality freshwater wetlands form the headwaters of the creek and have habitat for cavity-nesting ducks. The land also hosts an active bald eagle nest, a small great blue heron rookery, breeding mountain quail, cougar, and black bear. The objective is to protect the connected forests and wetlands from development, logging, and other commercial uses. (10-1117)

Washington State Department of Natural Resources Grant Awarded: \$75,560
Expanding the Admiralty Inlet Natural Area Preserve

The Department of Natural Resources will use this grant to buy and protect some of the 60 acres containing an endangered prairie plant population, imperiled old-growth forest, .4 mile of a feeder bluff, and numerous wildlife species dependent on these habitats. The property includes six waterfront lots, with outstanding views, that are threatened by development into high-end houses. The golden paintbrush population, which lives on the land, is one of only 12 remaining in the world. The 36-acre, old growth forest, which combines Douglas fir, western hemlock, oceanspray and swordfern, is one of only six in Washington. Wildlife nesting on the property include bald eagles, merlins, pileated woodpeckers, band-tailed pigeons, and pigeon guillemots. The bluffs, which feed the beach with sediment, and its adjacent kelp and eelgrass beds are critical fish and wildlife areas. The shoreline is a primary migration route for salmon and other species, including Puget Sound Chinook and Hood Canal summer-run chum, both federally designated as threatened with extinction. The land abuts the south boundary of the Admiralty Inlet Natural Area Preserve, and together, they will protect more than 90 contiguous acres of upland, 1 mile of shoreline, two rare prairie plant communities, and a rare natural forest community. Viewing areas and established, easily accessible walking trails exist on the property. The department will contribute more than \$2 million from a federal grant and cash donations. The department received only part of the \$2 million grant it requested, and may receive additional funds if money from other projects is unused. (10-1641)

Vashon Park District

Grant Awarded: \$400,000

Protecting the Whispering Firs Bog

The Vashon Park District will use this grant to buy voluntary land preservation agreements that prevent development on nearly 17 acres, encompassing 95 percent of Whispering Firs bog, and bringing the total protected acres to nearly 19. Housing development along the edge of this sensitive habitat would endanger the health of this sphagnum-dominated wetland, a wetland type listed as a top priority for protection by the State Department of Natural Resources. Whispering Firs bog is along the Vashon highway, and offers visitors opportunities to see birds such as the pileated woodpecker, a state candidate for listing as at risk of extinction, and migrating song birds. The park district will contribute \$420,000 in donations of cash and property interest. (10-1050)

Spokane County

Grant Awarded: \$1,633,198

Buying Antoine Peak

The Spokane County Parks, Recreation and Golf Department will use this grant to buy 338.75 acres, including the 3,375-foot-tall Antoine Peak, completing the last phase of a 1,061-acre conservation project. Antoine Peak forms a prominent backdrop to Spokane, Spokane Valley, Liberty Lake, and Newman Lake. The County wants to protect this critical habitat for wildlife and the million dollar views it offers, and open the area for wildlife watching. It is rare, if not unique, for a natural area of this size and diversity to be within 1 mile of an urban growth boundary. The land offers a broad range of year-round outdoor activities such as hiking, wildlife watching, equestrian use, mountain biking, picnicking, trail running, and cross-country skiing. Part of an important wildlife corridor that stretches north to Mount Spokane State Park and up into the Selkirk Mountains, it is used year-round by elk, moose, black bear, deer, and many other animals. A pond and many streams transect the property and help recharge the Rathdrum Prairie-Spokane Aquifer, the sole source of drinking water for more than 500,000 people. More than eight federal or state species with special status use the area. The County will contribute more than \$1.6 million in conservation futures⁴. (10-1264)

⁴ Conservation futures are a portion of property taxes used by local governments to buy land or development rights to protect natural areas, forests, wetlands, and farms.

RIPARIAN PROTECTION CATEGORY

The Nature Conservancy

Grant Awarded: \$776,000

Conserving the Clearwater River Banks

The Nature Conservancy will use this grant to buy some of the 1,114 acres, including more than 648 acres of riparian forest and wetland habitat along the Queets and Clearwater Rivers on the Olympic peninsula. These two rivers support some of the healthiest, most viable, and genetically diverse salmon populations in the lower 48 states, making them an essential anchor for the conservation of salmon ecosystems and biological diversity on the Washington coast. The rivers drain an area of more than 287,383 acres and are home to wild populations of Chinook, coho, chum, pink, and sockeye salmon, steelhead, and cutthroat and bull trout. The rivers and the forests along them also support other important animals, such as the Pacific lampreys, Olympic mudminnows, marbled murrelets, and bald eagles. This purchase is the first phase of a multi-year project to create a system of protected riparian forest habitat from the headwaters of the Clearwater to its confluence with the Queets. The purchase will address the two most significant habitat threats to these river systems: ongoing logging and development. The project protects a complex of riparian habitat, including mature, low-elevation Sitka spruce forest in the valley-bottom floodplain. The Nature Conservancy will contribute \$1.4 million in cash donations. The Nature Conservancy received only part of the \$930,200 it requested, and may receive additional funds if money from other projects is unused. (10-1553)

FARMLAND PRESERVATION CATEGORY

Columbia Land Trust

Grant Awarded: \$685,857

Preserving Trout Lake Valley Farms

The Columbia Land Trust will use this grant to buy a voluntary land preservation agreement to prohibit further development of 215.5 acres of the Schmid farm in the Trout Lake valley. The valley is a unique agricultural valley in the shadow of Mount Adams. It is renowned for its beauty, productive farm and forest lands, and abundant wildlife and recreation. The valley farmland is threatened by development of vacation houses. Of the 7,500 acres of land zoned for farmland, more than 300 homes could be built. The Schmid farm produces alfalfa, used to feed its dairy cows. The Schmid family is fourth generation Trout Lake farmers, and one of the first organic dairy farmers in the Pacific Northwest. The landowner will contribute \$685,857 in donated property interest.
(10-1682)

Okanogan Valley Land Council

Grant Awarded: \$90,143

Preserving the Ellis Barnes Livestock Company Ranch

The Okanogan Valley Land Council will use this grant to buy a permanent, voluntary land preservation agreement that will prohibit further development of 1,590 acres of the Ellis Barnes Livestock Company's ranch. The agreement will keep valuable rangeland and significant soils intact for agricultural use. The land includes 47 acres of wetlands that provide exceptional waterfowl habitat and other riparian values critical to the arid climate. The ranch abuts Whitestone Lake and is near Spectacle Lake, both open to the public for fishing and boating. The Barnes family began assembling this ranch in 1924 and it was incorporated in 1929, distinguishing it as one of the oldest "incorporated" ranches in Okanogan County. This family owned cow-calf operation is one of a handful still operating in the north end of the Okanogan Valley and contributes significantly to the local agricultural economy. The council will contribute \$849,200 in staff labor, a federal grant, and donated labor. The council received only part of the \$849,200 it requested, and may receive additional funds if money from other projects is unused.
(10-1275)
