

PROJECT REVIEW SHEET - EZ1

HISTORIC & CULTURAL RESOURCES REVIEW

Property / Client Name: Peshastin Creek Forest Service Road Improvement, 11-1442
Worksite Name/Number: Peshastin watershed (Worksite 1 of 1)
Funding Agency: Rec. and Conserv. Office

Project Applicant Chelan Co Natural Resource
Contact Person Michael Kaputa
Address 316 Washington St Ste 401
City, State, Zip Wenatchee, WA 98801
Phone (509) 667-6584
E-Mail mike.kaputa@co.chelan.wa.us

Funding Agency:

Organization Rec. and Conserv. Office
Address PO Box 40917
City, State, Zip Olympia, WA 98504-0917
Phone 360-902-3000
Contact Marc Duboiski, Email: marc.duboiski@rco.wa.gov

PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

The objective of the Peshastin Forest Service Road System Improvement project is to reduce road-related impacts to aquatic habitat in the Peshastin sub-watershed. Roads impact stream habitat quality by constricting the floodplain width, introducing fish passage barriers, altering stream hydrology (increasing flashy hydroperiods), and increasing sediment loading. Specifically, USFS is targeting road treatments to reduce sediment input to streams and improve fish passage in the Upper (Tronson, Scotty, Ruby, and Shaser) and Lower (Camas, Hansel, and Mill) Peshastin subwatersheds as well as the mainstem of Peshastin Creek; there are no roads in the Ingalls Creek subbasin. Peshastin Creek is a tributary to the Wenatchee River, entering the Wenatchee downstream of the town of Peshastin at about River Mile 20. The mainstem of Peshastin Creek is identified as a Category 2 watershed and road work is identified as a priority action for Peshastin Creek in the Implementation Schedule for the Upper Columbia Spring Chinook Salmon and Steelhead Recovery Plan. Road system improvements would primarily benefit all life stages of steelhead but also listed bull trout and spring Chinook. Road system improvements in tributaries to Peshastin Creek are targeted at addressing limiting habitat diversity and quality in the tributaries and in the mainstem of Peshastin Creek.

Describe existing project site conditions.

USFS lands

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra

See Attachment C of the project application for road treatment methods

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility EZ2 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>
