PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

This restoration project is located on the Nesbit Tree Farm on the mainstem Coweeman River, Cowlitz County located in section 23, T8N, R1W. The project reach includes 1.0 mile of the main stem Coweeman River ranging from river mile 13 to river mile 14. Stream restoration practices focus on placement of large woody debris and felling of whole trees from the riparian zone to trap sediment on exposed bedrock which will address stream temperature concerns in the watershed and provide improved habitat quantity and diversity for both adult and juvenile salmonids. Stream temperature concerns are well documented within the Coweeman River. The project reach lies in the center of the principal reach of concern from Mullhollan Creek to Goble Creek. The proposed project compliments eight projects already implemented by the Conservation District and two additional 2011 project proposals. Project emphasis is placed on addressing the restoration needs, limiting factors, and priority life stages for fall Chinook, coho, and winter steelhead as identified in the Lower Columbia Salmon Recovery and Fish and Wildlife Subbasin Plan and 2010 Habitat Strategy.

Describe existing project site conditions.

Designated Forest Land. Exhibits legacy of splash damming practice

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra

None

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility EZ2 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>

No
