PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

The Christmas Creek Drainage Restoration is an RMAP project with a unique opportunity to restore the majority of blockages on significant fish bearing tributary to a major producer of smolt on the Clearwater River in Jefferson County. The Christmas Creek tributaries comprise more than three miles of currently inaccessible stream. Within these three miles of habitat are several miles of salmonid spawning, rearing and overwintering habitat.

The project will consist of removing 4 separate culverts; 1 of the structures will be replaced with a bridge, 2 will be removed and replaced with appropriately sized pipes, and the last will be design only. The targeted species to benefit from these projects are Coho, Steelhead and Cutthroat with Coho as the primary species benefiting from the culvert replacements/removals.

Describe existing project site conditions.

the current land use of this site is and has historically been as an active logging road. the land is currently under the management of Rayonier's Western Forest Resources division. past human uses have been associated with natural resource harvesting. salmon habitat functions are spawning, rearing and refugia.

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra there will be a variety of excavation tools used during this project. some of which will be back hoes, shovels and etc.

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility EZ2 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>
