PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

The Union river Estuary Restoration project is a straight restoration project based on the design funded by the SRFB in 2010. It is located at the mouth of the Union River in Mason County adjacent to Belfair and represents over 23% of the original Union/Lynch Cove Estuary

The purpose of this project is to restore the estuary and tidal function to over 32 acres by breaching the existing dike in two locations, regrading to a variety of elevations, accommodation storm water drainage, replicating native estuarine habitat, primarily vegetated estuarine saltmarsh habitat necessary for juvenile endangered Hood Canal summer chum and Puget Sound Chinook as well as coho, cutthroat trout.

It is also designed to prevent flooding of surrounding property owners while accommodating continued recreational use of the existing trail system (IAC 1994) with pile supported walkways over the dike breaches. One 300 foot breach and another 100 foot breach will permit both salt and fresh water inundation and create maximum value for the scale of the project.

Land use changes have been documented (LFA, 2003) and the Union river is identified as a tier 1 priority watershed S H R S, 2004) for habitat restoration.

Describe existing project site conditions.

Diked Agriculture (Grass Hay)

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra

This project will use heavy machinery to complete the scope of work including, excavators, bull dozers, back-hoes and dump trucks.

PROJECT REVIEW SHEET - EZ1

HISTORIC & CULTURAL RESOURCES REVIEW

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility EZ2 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>

No
