Organization Rec. and Conserv. Office
Address PO Box 40917
City, State, Zip Olympia, WA 98504-0917
Phone 360-902-3000
Contact Marc Duboiski, Email: marc.duboiski@rco.wa.gov

PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

This project would involve the removal of old bank hardening associated with the Robinson Road right of way. The project site is on Skagit County park property located at the end of the Robinson Road. This land was acquired by the Skagit Land Trust with grant funding from the SRFB and later transferred to the County. Located on the property is the old Robinson right of way which historically connects to Utopia Road just downstream. This road has long been abandoned but bank armoring still remains. Our proposal is to complete a risk assessment study as to the potential effect of the rock removal to infrastructure and private property. After the completing the risk analysis we will work towards removing the rock and replanting the disturbed area with native vegetation. The length of the project site is approximately 250 feet. The rock is currently covered by Red Alder, Salmonberry and Blackberry. The risk assessment will also include looking at the risk of removing additional bank hardening on County land upstream. Funding for removal of this additional upstream rock is not currently being requested. The riparian vegetation on the site is dominated by deciduous species so we will also propose to remove invasives and under plant with conifer species to enhance diversity.

Describe existing project site conditions.

The site is currently being managed as a primitive park with no vehicular traffic allowed past a gate. The site was previously privately owned. The site involves ~2300 feet of Skagit River waterfront and is well vegetated.

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra

Large rocks will be removed from an old County right of way. An excavator and truck will be used to remove bank hardening. A mower may be used to remove invasive plants and shovels etc. will be used for planting.

PROJECT REVIEW SHEET - EZ1

HISTORIC & CULTURAL RESOURCES REVIEW

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility EZ2 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>

No building will be demolished
