City, State, Zip Olympia, WA 98504-0917
Phone 360-902-3000
Contact Marc Duboiski, Email: marc.duboiski@rco.wa.gov

PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

The project continues an effective collaboration to protect, through acquisition, high quality Chinook habitat in the Skagit River system. The project area includes Tier 1 and Tier 2 floodplains of the Skagit River and major tributaries located in the upper Skagit River reach, upstream of Rockport, as identified in the Skagit Watershed Council's (SWC's) Year 2010 Strategic Approach. Priority parcels are determined by the guidelines identified in SWC's Year 2010 Strategic Approach, previous and forthcoming assessments, and new site-specific information and/or further analytical work approved by SWC's Protection Committee. The top four target properties are located along Sorenson Creek, Jackman Creek, Jones Creek, and the mainstem Skagit River.

Critical freshwater rearing and spawning habitat is currently limiting the production of the six independent Skagit River Chinook populations identified in the Skagit Chinook Recovery Plan (2005) and by the Puget Sound Chinook TRT (Rucklehaus et al. 2006).

Describe existing project site conditions.

Currently in agricultural use and has been for many years. Historically there is an old WCC camp on a portion of the Goodpaster property. Lyman's "backup" well is located on site, out of the floodplain.

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra NA-acquisition only

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility EZ2 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>

If the portion of the property containing the old WCC campsite are retained, structures will undergo DAHP review and may likely need to be protected and maintained for historical value.
